Fluxo-Floema is a detective novel of sorts--pornographic, scatological, and spiritual--that ultimately references the failure and success of writing. It's about vocabulary, astrology, dramaturgy, science, a story within a story within a story. It's a celestial map to social interaction and the failure of connection, a crafted examination of the distortions of religion and piety. Here we, the reader, visit nonsense, pathos, violence, and the flights of fancy of human coexistence.

Electronic Tools for Translators offers complete explanations of a wide range of software products, information resources and online services that translators now need to understand and use. Individual chapters run through the origins and nature of the internet, the many ways of searching for information, and translation resources on the web, CD-ROMs as information sources, computer-assisted terminology management, the use and construction of corpora, translation memories, localization tools, and the incorporation of machine translation programmes into the translation process. Austermühl explains all these tools and resources in a clear, step-by-step way, suggesting learning tasks and activities for each chapter and guiding the reader through the jargon. Examples are drawn from English, French, German and Spanish. The book can be used as a text in regular classes on computer-assisted translation, in translation practice classes, as well as for self-learning by professionals wishing to update their skills.

The narrator of this stark and elegantly translated novel is a psychiatrist named Antnio Lobo Antunes, returning from vacation to his loathed job at Miguel Bombarda Hospital in Lisbon. Over the course of the trip, the narrator's mind ranges over the monstrosities he encountered in the colonial wars in Angola in the 1970s and in his work; through the layering of memories, he draws parallels between the destruction of the war and the questionable care offered to the mentally ill.

Translation and Globalization is essential reading for anyone with an interest in translation, or a concern for the future of our world's languages and cultures. This is a critical exploration of the ways in which radical changes to the world economy have affected contemporary translation. The Internet, new technology, machine translation and the emergence of a worldwide, multi-million dollar translation industry have dramatically altered the complex relationship between translators, language and power. In this book, Michael Cronin looks at the changing geography of translation practice and offers new ways of understanding the role of the translator in globalized societies and economies. Drawing on examples and case-studies from Europe, Africa, Asia, and the Americas, the author argues that translation is central to debates about language and cultural identity, and shows why consideration of the role of translation and translators is a necessary part of safeguarding and promoting linguistic and cultural diversity.

Sound—one of the central elements of poetry—finds itself all but ignored in the current discourse on lyric forms. The essays collected here by Marjorie Perloff and Craig Dworkinbreak that critical silence to readdress some of thefundamental connections between poetry and sound—connections that go far beyond traditional metrical studies. Ranging from medieval Latin lyrics to a cyborg opera, sixteenth-century France to twentieth-century Brazil, romantic ballads to the contemporary avant-garde, the contributors to The Sound of Poetry/The Poetry of Sound explore such subjects as the translatability of lyric sound, the historical and cultural roles of rhyme,the role of sound repetition in novelistic prose, theconnections between "sound poetry" and music, between the visual and the auditory, the role of the body in performance, and the impact of recording technologies on the lyric voice. Along the way, the essaystake on the "ensemble discords" of Maurice Scève's Délie, Ezra Pound's use of "Chinese whispers," the alchemical theology of Hugo Ball's Dada performances, Jean Cocteau's modernist radiophonics, and an intercultural account of the poetry reading as a kind of dubbing. A genuinely comparatist study, The Sound of Poetry/The Poetry of Sound is designed to challenge current preconceptions about what Susan Howe has called "articulations of sound forms in time" as they have transformed the expanded poetic field of the twenty-first century.

Translation technology has evolved quickly with a large number of translation tools available. In this revised addition, much content has been added about translating and engineering HTML and XML documents, multilingual web sites, and HTML-based online help systems. Other major changes include the addition of chapters on internationalizatoi, software quallty assurance, descktop publishing and localization supprort. There is a focus on translators who want to learn about localization ad translation technology.

A soaring, symphonic epic by the Portuguese master novelist, considered to be the "heir to Conrad and Faulkner" (George Steiner). The razor-thin line between reality and madness is transgressed in this Faulknerian masterpiece, António Lobo Antunes's first novel to appear in English in five years. What Can I Do When Everything's On Fire?, set in the steamy world of Lisbon's demimonde—a nightclub milieu of scorching intensity and kaleidoscopic beauty, a baleful planet populated by drag queens, clowns, and drug addicts—is narrated by Paolo, the son of Lisbon's most legendary transvestite, who searches for his own identity as he recalls the harrowing death of his father, Carlos; the life of Carlos's lover, Rui, a heroin addict and suicide; as well as the other denizens of this hallucinatory world. Psychologically penetrating, pregnant with literary symbolism, and deeply sympathetic in its depiction of society's dregs, Lobo Antunes's novel ventriloquizes the voices of the damned in a poetic masterwork that recalls Joyce's Ulysses with a dizzying farrago of urban images few readers will forget.

Throughout the novels and stories. The cosmicomical tales, with their focus on science, are seen as crucial to the development of the symbolic mindscapes that made Calvino a major international writer. He died before arriving at any satisfactory solution to the problems of relating the 'I' to the 'not-I', but Hume derives from his later works a philosophy based on the creation of likenesses, of internal microcosms that permit us to mirror the macrocosm. These interior.
