From the author of *Serial Killers: The Method and Madness of Monsters* comes an in-depth examination of sexual serial killers throughout human history, how they evolved, and why we are drawn to their horrifying crimes. Before the term was coined in 1981, there were no "serial killers." There were only "monsters"--killers society first understood as werewolves, vampires, ghouls and witches or, later, Hitchcockian psychos. In *Sons of Cain*--a book that fills the gap between dry academic studies and sensationalized true crime--investigative historian Peter Vronsky examines our understanding of serial killing from its prehistoric anthropological evolutionary dimensions in the pre-civilization era (c. 15,000 BC) to today. Delving further back into human history and deeper into the human psyche than *Serial Killers*--Vronsky's 2004 book, which has been called the definitive history of serial murder--he focuses strictly on sexual serial killers: thrill killers who engage in murder, rape, torture, cannibalism and necrophilia, as opposed to for-profit serial killers, including hit men, or "political" serial killers, like terrorists or genocidal murderers. These sexual serial killers differ from all other serial killers in their motives and their foundations. They are uniquely human and--as popular culture has demonstrated--uniquely fascinating.

A delightful storybook in the series that inspired the Franklin and Friends TV show! In this Franklin Classic Storybook, our hero is a very lucky turtle. He has the best friends, the best little sister, the best goldfish, and, of course, the best mother. But when he discovers that his mother's birthday is coming up, he can't find the best present. After giving it some serious thought, Franklin decides to do everything for his mom. On the morning of her birthday he takes her breakfast in bed, makes a brooch, draws a picture, and cuts fresh flowers from the garden! And then Franklin gives his mom a great big hug and says, "I love you"--which is, of course, the best gift of all.

Published by the University Art Museum, California State University, Long Beach in association with Getty Publications The renowned Argentine conceptual artist David Lamelas (born 1946) has an expansive oeuvre of sensory, restive, and evocative work. This book, published to coincide with the first monographic exhibition of the artist's work in the United States, offers an incisive look into Lamelas's art. The guiding analytic theme is the artist's adaptability to place and circumstance, which invariably influences his creative production. Lamelas left Argentina in the mid-1960s to study at Saint Martin's in London. Since then, he has divided his time among various cities. While the typical narrative invoked about artists like Lamelas is one of "internationalism," his nomadic movement from one place or conceptual framework to the next has always been more "postnational" than "international."

Donna Shirley's 35-year career as an aerospace engineer reached a jubilant pinnacle in July 1997 when Sojourner--the solar-powered, self-guided, microwave-oven-sized rover--was seen exploring the Martian landscape in Pathfinder's spectacular images from the surface of the red planet. The event marked a milestone in space, but for Donna Shirley, the leader of the mostly male team that designed and built Sojourner--and the first woman ever to

manage a NASA program--it marked a triumph of another kind. *Managing Martians* is Shirley's captivating memoir of a life and career spent reaching for the stars. From her seemingly outlandish aspiration at age ten to build aircraft, to abandoning high school Home Ec in favor of mechanical drawing, and, at sixteen, becoming a licensed pilot, Shirley defied expectations from the beginning. In a vivid narrative, rich with anecdotes and thrilling turning points, Shirley recounts the intense battles she waged to defend her vision and the ingenuity and resourcefulness of her committed team. Her moment-by-cliffhanging-moment account of Pathfinder's landing and Sojourner's first tentative foray across the sands of Mars brilliantly captures the fulfillment of a lifelong dream as it heralds a brave new era of space exploration.
