Water Cycle, due to the heat from the sun, water on the earth's surface and in the soil evaporates. When the water vapor is created, it travels higher into the atmosphere until it reaches a point called the Cold Trap.

~~Interaction between Atmosphere and Hydrosphere - Sphere~~

...

The hydrosphere stretches all the way from the Earth's surface downward numerous miles into the lithosphere and high above the crust into the atmosphere. Most of the water in the atmosphere is in gaseous form and as it rises higher into the atmosphere it condenses to form clouds which fall back on earth as precipitation.

~~Study Guide For Hydrosphere - mx1.studyin-uk.com~~

The spheres are the four subsystems that make up the planet Earth. They are called spheres because they are round, just like the Earth. The four spheres are the geosphere (all the rock on Earth), hydrosphere (all the water on Earth), atmosphere (all the gases surrounding Earth), and biosphere (all the living things on Earth).
