A pictorial history of the Ford dealership from 1903 to 1954.

With refreshing candor and self-deprecating humor, Wayne takes the reader with him on the adventure to Medjugorje that radically and permanently changed his life. You will discover the apparitions of the Blessed Mother along with him, as he chronicles the ways that the Virgin Mary continues to speak to the world today from Medjugorje. "In a tiny village in the mountains of Yugoslavia, the Virgin Mary, mother of Jesus Christ, had reportedly been appearing to a group of local teenagers, beginning in June, 1981, and continuing every evening since." So begins journalist Wayne Weible's life-transforming investigation into the veracity of one of the most popular Marian apparition claims in history. What began as a quick attempt to add some spice to his regular newspaper column resulted in a life-long exploration of the apparitions of the Blessed Mother that are still happening at Medjugorje, and the lives that are changed as a result. Do miracles happen? Wayne Weible is one former skeptic who is now convinced that they do. Paraclete Press presents a special, hardcover, illustrated edition of Medjugorje: The Message---the best-selling English-language book on the subject--- on the occasion of the 25th anniversary of Mary's first message to six youths in the mountains. This new edition includes a new preface by the author and a special, eight-page photo insert.

The book combines the approaches of maritime history and ecological science to explore the evolution of life-forms and eco-systems in the ocean from a historical perspective, in order to establish and develop the sub-discipline of marine environmental history. Documentary records relating to the human activity, such as fishing, plus naturally occurring paleo-ecological data are analysed in order to determine the structure and function of exploited ecosystems. The book is divided into four chapter groups, the first concerned with Newfoundland and Grand Banks' fisheries, the second with the potential of historical sources to provide a history of marine animal populations, the third explores the development of fisheries in the southern hemisphere during the twentieth century, and the final section explores the limitations of data and existing analysis of whale populations. The epilogue reiterates the suggestion that collaboration between historians and biologists is the key to furthering the sub-discipline.
