Clear and concise text guides you through each engine-rebuilding step. Complete information is included on how to diagnose, remove, tear down, inspect, recondition, assemble, and install all Nissan and Datsun L-series engines. Bonus sections list parts identification and interchange, and explains in-vehicle cylinder head and timing chain repair.

Coax more power from your engine! This guide tells you how to choose L-series engine parts, and prepare and assemble them for optimum power and durability. Filled with L-series mods for road, drag and off-road racing, improved street performance, plus complete mods to crankshaft, pistons, cylinder heads, electrics, carburetion, exhaust and more. Covers 51, 61, 71, 2SX, 24Z, 26Z, 28Z, 28ZX and pick-

up truck engines. Includes parts interchange.

Krause Publications' Standard Catalog series is available by specific marque, in individual volumes or a set. Each book contains in-depth profiles of specific makes by model, factory photos, and up-to-date vehicle pricing. The 1-to-conditional pricing system assures readers of accurate values, whether a vehicle is a #1 low-mileage, rust-free beauty or a #6 parts-only heap. "Techs & specs", original factory prices, production and serial numbers, and engine/chassis codes are noted by model, thus helping you determine authenticity accuracy. Historical, technical and pricing information are combined from hundreds of sources. James Flammang values each model according to the popular 1-6 grading system invented by Old Cars magazine.

The Datsun 240Z was a landmark in automotive history--some say the Japanese E-type Jaguar--and by the time the first generation of Z--cars came to an end in 1978, everyone around the world knew the name Datsun and that the company was serious about sports cars.

The role that combustion plays in the world's energy systems will continue to evolve with the changes in technological demands. For example, the challenges that we face today are more focused on the conservation of energy and addressing environmental concerns, which together necessitate cleaner and more efficient combustion processes using a range of fuel sources. This book includes contributions to highlight the recent progress in theory and experiments, development, and demonstration of technologies and systems involving combustion processes, for the production, storage, use, and conservation of energy.

Cars.

Various combinations of commercially available technologies could greatly reduce fuel consumption in passenger cars, sport-utility vehicles, minivans, and other light-duty vehicles without compromising vehicle performance or safety. Assessment of Technologies for Improving Light Duty Vehicle Fuel Economy estimates the potential fuel savings and costs to consumers of available technology combinations for three types of engines: spark-ignition gasoline, compression-ignition diesel, and hybrid. According to its estimates, adopting the full combination of improved technologies in medium and large cars and pickup trucks with spark-ignition engines could reduce fuel consumption by 29 percent at an additional cost of \$2,200 to the consumer. Replacing spark-ignition engines with diesel engines and components would yield fuel savings of about 37 percent at an added cost of approximately \$5,900 per vehicle, and replacing spark-ignition engines with hybrid engines and components would reduce fuel consumption by 43 percent at an increase of \$6,000 per vehicle. The book focuses on fuel consumption--the amount of fuel consumed in a given driving distance--because energy savings are directly related to the amount of fuel used. In contrast, fuel economy measures how far a vehicle will travel with a gallon of fuel. Because fuel consumption data indicate money saved on fuel purchases and reductions in carbon dioxide emissions, the book finds that vehicle stickers should provide consumers with fuel consumption data in addition to fuel economy information.

In this immersive and inspirational book, Grammy Award-nominated singer Kierra Sheard shares her hard-won advice on body positivity, spiritual self-care, goal setting, finding your joy, and living boldly in faith, empowering you to grab the life you're meant to lead. Every one of us was born to make a difference. But do you sometimes feel overwhelmed by the things the world prioritizes, thinking you don't match up or you don't fit into the mold? Or do you wish you had a more supportive family, or
